

GREEN VIBRANCE

Most award-winning nutritional supplement.

VIBRANT
HEALTH®

Key Benefits

- Concentrated nutrition
- Improved digestion
- Strengthened immunity
- Enhanced circulation

Key Ingredients

Probiotics, cereal grasses, sunflower lecithin, spirulina, beet, spinach, flax kale, tomato, strawberry, pomegranate, holy basil

GREEN VIBRANCE

Supporting the 4 foundations of health: nutrition, digestion, circulation and immunity.

Green Vibrance is a concentrated superfood with a purpose: **to make you healthier and stronger.*** Green Vibrance feeds each cell with what it needs to run at peak efficiency. Our vitality is the sum total of the health of each cell. To reach optimal health, the immune system must be strong, have a robust gastro-intestinal tract that can draw in complete nutrition, and those nutrients must in turn be delivered to all cells of the body by a healthy circulatory system.

FIXING NUTRIENT DENSITY

Our ancestors commonly received much more nutrition per calorie than we get from our foods today. Human biochemistry adapted to that ancient food supply

with its greater nutrient density. It is that same, ancient biochemistry that attempts to run us today.

But today, something is missing. Statistics compiled by the U.S. Department

of Agriculture verify a precipitous drop in nutrient density within our common food supply in just the last fifty years. The loss of trace nutrients is so great that it removes any argument that dietary supplementation is optional. We firmly believe supplementation is now mandatory in order to achieve full nutrition and optimal health. Green food supplements, if properly formulated, can provide astounding nutrient density returning our dietary intake of micronutrients to something more closely approximating the richness of our ancestral, Paleolithic diet.

CONCENTRATED NUTRITION

The ingredients in Green Vibrance were selected to support the essential bodily functions without which life cannot be sustained. Cereal grass powders and juices deliver unmatched nutrient density and several uncharacterized co-nutrients of great value. For example, cereal grasses contain a hidden growth factor that causes young animals to more rapidly develop, growing larger, stronger, and healthier with more robust

immune systems. Those same cereal grasses allow mature animals (including humans) to repair bodily tissues more quickly. Organic kale sprouts, organic broccoli sprouts, organic spirulina, organic beet juice, organic parsley, organic spinach, organic carrot and zucchini enrich the nutrient density and diversity of the primary food ingredients in Green Vibrance.

PROBIOTICS AND DIGESTION

Our industry-leading dose of 25 billion friendly probiotics, a rich combination of Bifido- and Lacto-bacilli from 12 strains in each serving of Green Vibrance, bolsters the one system that must function well first and foremost if health is to be improved or optimized: digestion. One must be able to digest food and absorb nutrients into the body through the gastrointestinal tract before health can be sustained. The 12 strains of probiotics in Green Vibrance help assure a healthy G.I. tract by supporting colonies of robust and beneficial intestinal flora.

SUPPORTING CAST

Chlorophyll from green foods further supports intestinal health. Apple fiber from certified organic apple powder, soluble fiber from acacia gum, and sunflower lecithin

help support elimination of heavy metals, cholesterol and toxins from the intestinal tract before they can be absorbed. To a lesser degree, these ingredients can perform similar tasks in the circulating blood itself.

LIVER SUPPORT

The liver became quite adept at denaturing, destroying and getting rid of unnecessary substances in everyday foods during the millions of years humans and our ancestors have walked the Earth. 40% of a plain carrot is unneeded, toxic material, but your liver has no trouble handling that. However, when it comes to detoxifying some of the modern chemicals that are absorbed by, and circulate through, your body, we believe the liver needs a little help. In response, Green Vibrance contains ingredients that support liver health.

ANTIOXIDANTS AND CIRCULATORY SUPPORT

We all will encounter aging and degenerative disease in time. Nutritive antioxidants may diminish the severity and slow the advance of oxidative damage caused by human metabolism.[†] Each serving of Green Vibrance delivers

a powerful dose of herbal antioxidants in addition to beta-carotene, vitamin C, vitamin E and antioxidants naturally present in the other plant components of the formula. These antioxidants, plus lecithin, soluble fibers and more help support cardiovascular health.† A strong heart and clear arteries are essential for delivering nutrients to, and removing waste from, every cell in the body. Ginkgo biloba extract, grape seed extract, green tea extract, pomegranate extract, and grape skin extract are all known to improve peripheral circulation.

IMMUNITY

The immune support in Green Vibrance is delivered by beta-glucans, ResistAid® arabinogalactans and astragalus extract.† But let us not lose sight of the

immune enhancing effect of a healthy digestive tract, hosting 50% of immune cells. Well nourished, vibrant cells, amply protected by the army of antioxidants in Green Vibrance, are themselves resistant to disease.†

BONE HEALTH

Green Vibrance has always supported good skeletal health, undoubtedly due to its alkalizing nature, bioavailable boron and cissus quadrangularis extract (clinically shown to improve bone mineral density). Beginning long ago with version 9.0, we added another key nutrient for bone health: vitamin D₃. The vitamin D₃ from lichen oil in Green Vibrance is, like many of our ingredients, purely plant-based.
